

HARSHAVARDHANA MUDDULURU

+1-438-979-8729 | harshamudduluru3105@gmail.com | [LinkedIn](#) | [Portfolio](#)

Montreal, Quebec, Canada (Open to Re-Locate)

EDUCATION

- Masters in Applied Computer Science, Computer Science

Concordia University

Sep 2022 – Aug 2024

Montreal, Canada

- Bachelor of Engineering, Computer Science

Anna university

Aug 2018 – Jun 2022

Chennai, India

WORK EXPERIENCE

- Data Analyst (Part-Time) – PA Supermarche

Sep 2022 – Aug 2023

- Analyzed weekly sales trends with Pivot Tables, identifying high-demand products to optimize stock levels & minimize waste.
- Performance Reporting: Created automated Excel reports to track key metrics, **delivering actionable insights** to management.
- Insights: Used data-analysis to uncover purchasing patterns, supporting market strategies to enhance customer satisfaction.
- Forecasting: Assisted with **demand forecasting** to improve inventory management & **reduce overstock**.

- Data Information Management Analyst – Citi Bank, India

Jun 2021 – July 2022

- Ensured **consistency & integrity** of organizational data by performing quality checks, **data cleansing & validation** databases.
- Designed & delivered reports supporting company's decision-making. Provided actionable insights to senior stakeholders.
- Monitored & maintained large datasets in SQL databases, ensuring timely updates & compliance with organizational policies.
- Developed Excel macros & **automated workflows** to optimize data processing tasks, **reducing manual effort by 30%**.
- Partnered with cross-functional teams-risk management & IT, enhancing data governance & support enterprise-wide projects.

- AI Engineer Intern – Bennett University

Dec 2019 – July 2020

- Collaborated to develop drone-based search and rescue system using **3D Convolutional Neural Networks (3DCNN)** and **Single-Shot Detector (SSD)** networks to detect distressed individuals from drone video feeds.
- Coded the system to identify people waving for help, **extract their GPS coordinates**, and send the data to a central database. The system also **reduced redundant data by cropping & storing unique human figures**.
- Single-Shot Detector (SSD) was utilized for **rapid & precise human detection**, significantly optimizing system's responsiveness & efficiency in time-sensitive rescue missions, ensuring timely identification and response to critical situations.
- **Mean Squared Error (MSE)** was employed to perform detailed **similarity checks**, ensuring high accuracy in distinguishing and comparing detected human figures, thereby effectively **reducing redundant data** & improving overall system performance.

ACADEMIC PROJECTS

- Comparative Analysis of Augmenting Route Algorithms in Graph Networks | Java, Git

Sep 2023 – Nov 2023

- Conducted comparative analysis of augmenting route algorithms, including Shortest Augmenting Path, DFS-like, Maximum Capacity, & Random Path, to optimize maximum flow in graph networks, evaluating their performance in terms of efficiency.
- Implemented **Ford-Fulkerson** as foundational algorithm, achieving a **7% efficiency** improvement with SAP & **5% efficiency** with **DFS-like algorithm** in sparse networks, effectively reducing iterations & computational complexity.

- Open Tracks Concordia | Java, Android, Maven, Git, Agile

Jan 2023 – Apr 2023

- Improved open-source real-time application by **adding weather-display & fixing bugs** to enhance user experience.
- Integrated Weather APIs to fetch & incorporate external weather data, providing **real-time updates** within app.

- Flight Data Analysis using MPI and Docker | Python, MPI, Docker

Sep 2022 – Dec 2022

- Developed Python scripts to analyze data, utilizing **Message Passing Interface (MPI)** enabling efficient data distribution.
- Created a Docker environment with multiple containers & analyzed efficiency of script with different numbers of containers to implement Distributed System Design concepts like **parallelism, fault tolerance, scalability**.

- Real-Time Driver Drowsiness Detection System | python, NumPy, OpenCV, Keras, DL

Aug 2020 – Oct 2020

- Developed alert system to detect & monitor driver drowsiness, reducing response time to fatigue **within 2 seconds** & addressing major traffic accident causes by providing real-time alerts & enhancing road safety.
- Employed **OpenCV** for real-time eye movement analysis, enabling precise detection of driver eye states. Used **Keras** to build & train deep learning models (VGGNet, ResNet), achieving **93% accuracy** in drowsiness detection.

CORE SKILLS

- **Technical skills:** Python, Java, C, C++, HTML/ CSS, JavaScript, Docker, Git, Agile
- **Data Science & Machine Learning:** NumPy, Pandas, Scikit-Learn, OpenCV, Matplotlib, Predictive Analysis
- **Visualization Tools:** Microsoft Power BI, Tableau, Microsoft Excel (Advance)
- **Database Management:** ETL, MySQL, Data Mining
- **Soft skills:** Innovative, Communication, Teamwork, Committed, Analytical, Flexible, statistical, Problem-solving, Time Management

CERTIFICATIONS

- **Deep Learning for Computer Vision** - Certified by NVIDIA Deep Learning Institute
- **Preparing Data for Analysis with Microsoft Excel** – Certified by Microsofts
